Urantia BOOK GLOSSARY: USAGE NOTES

This *GLOSSARY AND PRONUNCIATION GUIDE* has been limited primarily to those words used in *The Urantia Book* which are not included in other standard reference sources.

The pronunciations indicated are those generally used by English-speaking readers of *The Urantia Book* in the United States and may differ from pronunciations used in other countries and languages. The pronunciation principle followed in this *GLOSSARY* has been to record the actual, current use by long-time readers, without intending to dictate standards of correctness. A phonetic spelling approach to pronunciation has been used for simplification and to avoid the need to include a separate guide for pronunciation symbols. It is our intention, however, in future editions to utilize the alphabet of the International Phonetic Association IPA to facilitate international usage of this guide.

The accent mark used is a single accent (') denoting stress to be put on the most heavily pronounced syllable in the word.

The reference notations within brackets denote Paper:Section.Paragraph. Thus [45:2.3] refers to Paper 45, section 2, paragraph 3.
